Art Unit: 1616

- I. New matter objection is withdrawn. Applicant has amended claims deleting new matter phrases: "on an ongoing basis" and "and sustain".
- II. Rejection of claims 18,21-23 under 35 USC 102(b) as being anticipated by Bykova will not be maintained (SU '653). Applicant is correct in that Bykova teaches a diagnostic test for MS rather than a treatment regimen.
- III. Rejection of claims 18,21-23 under 35 USC 102(b) as being anticipated by Greenberg will be maintained for reasons on record and reasons as follows. Applicant argues that Greenberg fails to teach a method of therapeutic treatment. Examiner argues and maintains that Greenberg clearly teaches the "chronic treatment" of rats with monoamine oxidase-A agonist (reserpine) which is a therapeutic treatment method. See reference. Applicant argues that Greenberg does not teach a regimen but rather a chronic treatment. Examiner argues that a chronic treatment is regimen which consists of dosage determination.
- IV. Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art references do not teach or suggest the instant method of administering 1-10 mg/kg S.C. per day of a monoamine oxidase-A.
